

SPACE FINANCE WHITEPAPER

Space is a reflective, deflationary BSC token, that auto-compounds in users wallets.

Deflationary properties

SPACE supply will reduce in every transaction, there is 2.5% Burn in every transaction, that ensures SPACE will become more scarce over time.

The burn is automatic and it is coded into SPACE smart-contract.
Every burn can be confirmed in the blockchain.

COMPOUNDING

SPACE auto-compounding properties

All SPACE transactions have got a 2% fee that will be distributed to all holders.
This ensures SPACE accumulates in your wallet over time.
This will ensure SPACE holders benefit with market volatility.

SPACE BEP20 Token

There is no need to stake or farm and waste countless transaction fees,
SPACE auto compounds in your wallet, you only need to make sure you keep it safe.
